PREFACE

TOWN OF CARVER - TOWN CLERKS RECORD BOOK

VOLUME I
RECORDS OF BIRTHS, MARRIAGES & DEATHS

Copied by John A. Shaw 1998

It appears that parts of this volume may (?) Have been transcribed from record books of the Town of Plympton whereas many of the births recorded are several years prior to the Town of Carver being incorporated in the year 1790. It is my assumption that only the names of residents within the area of what is now Carver were entered.

The period covered varied from as early as the 1730's to as late as the mid 1850's.

I did not find any name in the record book as to who made the entries or as to when the entries were made or where the information came from. One would assume it would be the town clerk at the time of transcription who made the entries.

A book published in 1911 lists most of these same names but adds a middle name and quite often the spelling of a name is different.

The front cover of this book has the words: "Carver Vital Records"
The edge of the binding has the words: :Carver Mass. Vital Records to 1850"
The inner page lists the book as:

"Vital Records of Carver Massachusetts to the year 1850
Published by the New England Historic Genealogical Society
At the charge of the Eddy Town-Record Fund
Boston, Mass. 1911
Stanhope Press F.N. Gilson Company Boston U.S.A."

I was confronted with many questionable items which might have been the work of the transcriber or possibly the way they appeared in the Plympton records, such as:

Whenever the name Frances was inserted as a middle name for a woman it was spelled "Francis" In another instance the middle name for a male was spelled "Frances."

The name Abigail was usually spelled "Abagail" but that may have been the common spelling for the era (?).

The dates of one transcription would have one woman giving birth to a second child one month after the first child and in another case a woman supposedly gave birth to a child in the spring and then gave birth to a second child in the fall of the same year.

Each of the children's names in the record book **included** the fathers surname following their name, however for my own convenience I did not choose to repeat it after every name entered.

Occasionally the same name will appear twice in a row in the alphabetical index but with different page numbers which at first may look confusing. The earliest page number lists that persons name under the parents name along with date of birth. The later page number lists that same person as husband or wife along with their children's names.

Also the old style writing of an "s" appears as an "f" in which case I have copied as written.

Whenever a name or word appears in *"italics"* it signifies that I added it to the original transcription from information I obtained from other sources, however, it is only for consideration and not to be considered as conclusive.

I copied the record book verbatim but created the alphabetical index format myself. The alphabetical index, in some instances, lists a married woman three different ways: Once as a child of: (under her parents name); once under her married name and again under her Maiden name with reference to her husbands name. Their are over 2,825 listings in the alphabetical index.

Also in the alphabetical index in the right margin, the volume number and the page number of the original record book is listed as: "Vol.I:1" & "Vol.I:123" etc. Don't confuse the page numbers of this document with the pages referred to in the record book.

I have used the following symbols or abbreviations throughout the alphabetical listing:
H:= Husband W:= Wife --- = a blank or date or word missing from original transcript.
